DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-15,17,20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Baran (USPN 4,417,576).

Baran disclose a catheter comprising a balloon E having an outer surface, a membrane U having a plurality of pores therein and having an outer and inner surface wherein the membrane is disposed about the balloon; a reservoir/space between the outer surface of the balloon and the inner surface of the membrane and wherein the reservoir is connected to a reservoir lumen S and a biostable sponge coating D disposed upon the outer surface of the membrane wherein the sponge coating D is exposed to the body lumen when the catheter is inserted or implanted into the body lumen. The material of the sponge coating is rubber which is a non-hydrogel polymer. The balloon inflation lumen is T. Applicant has claimed a reservoir but only functionally claimed the reservoir capable of containing a biologically active material. Claim 15 is considered to be product by process.

Application/Control Number: 10/071,400

Art Unit: 3763

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 16 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Baran (USPN 4,417,576).

Baran discloses the invention as substantially claimed. See above. The Examiner is considering Baran to have a void space, which is greater than about 60% of the volume of the sponge coating when in the expanded condition. If Applicant does not deem this feature to be anticipated as shown in Figure 3, then it would have been obvious to one of ordinary skill in the medical balloon art to modify the void space to have a greater than about 60% volume of the sponge coating when in the expanded region in order to allow biological active material to be release to the tissue.

Response to Arguments

Applicant's arguments with respect to claims 14-17,20-22 have been considered but are persuasive. Applicant has argued the claim as amended. The Examiner has written the rejection as applied to the newly amended claims. Baran does disclose a catheter having a balloon E having an outer surface, a membrane U with an outer surface, inner surface and a plurality of pores therein and disposed about the balloon, a reservoir between the outer surface of the balloon and the inner surface of the

Art Unit: 3763

membrane and a sponge coating D upon the outer surface of the membrane and the sponge coating D exposed to the body lumen.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LoAn H. Thanh whose telephone number is (571) 272-4966. The examiner can normally be reached on Mon. - Fri. (First Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick Lucchesi can be reached on (571) 272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
